Experience

Stipple, Front End Web Developer & QA/Support Engineer [July 2013 - Current]

- Develop test case scenario demo sites used for demonstrating Stipple to clients.
- Create and implement QA test scenarios for new designs, both mobile and desktop.
- Communicate designs through user stories and style guides for the back end engineers.
- Maintain Stipple's technical support system resolving upwards of 30 tickets per day.

University of Colorado Denver, Web Developer [Aug 2007 - February 2013]

- Coded all school and college site Photoshop mockups into usable Web sites within the constraints of the university's content management system.
- Developed the University's mobile Web site, making it easier for students to access information quickly.
- Served on a usability-focused team that made the enterprise CMS more standards-compliant.
- Maintained the web team's support queue answering questions and support requests from professors and educators.

Casey Mac Photography, Owner, Web Developer [Oct 2009 - Present]

- Use Wordpress-based Web site as a playground for learning and staying up to date with new Web technologies and trends (caseymacphoto.com).
- Created number one seller of presets for Lightroom, Photoshop, and Aperture that mimic Instagram filters. Featured on The Verge, Petapixel, Cult of Mac, and more.
- Photos featured in Outside Magazine, Backpacker Magazine, Patagonia's blog, and more.

Texas Tech University Center for Campus Life, Web Developer [Feb 2007 - Aug 2007]

- Used PHP to create a dynamic membership database for the Center for Campus Life's Red Raider orientation program.
- Created a streamlined process of submitting a site requests to relieve countless emails sent to the Center directors.
